Designed by the famous Gary Lidgard design studio, the Fusion 40 stands alone as a truly affordable high performance cruising catamaran. With her graceful lines and seamless construction, one might mistake her for a one-of-a-kind custom yacht costing twice as much. True to Lidgard's reputation as a world class designer, the Fusion 40 performs exceptionally well in all weather conditions with either mini keels or optional carbon fiber dagger boards. With the Fusion's high freeboard, wide beam, tall wingdeck clearance and powerful rig, it's obvious this cat can endure the biggest challenges at sea.

Fusion 40

Construction

STRUC

The Fusion 40 utilizes the latest advances in yacht construction. The molds were built with the use of a 5 axis computer aided router to assure the best of finishes.

All Fusion yachts are built using industry-leading modular vacuum infusion technology. Using only the finest modified vinylester resins along with the most advanced closed cell foam cores, the Fusion 40 assures the strongest, lightest, safest performance cruising cat on the market.

Technological advances continue in all aspects of the Fusion 40's construction, from the Airpax "two wire" system that is setting the standard for the next generation in electrical circuitry, to it's use of only the latest advances in deck gear and hardware.

Interior

Interior

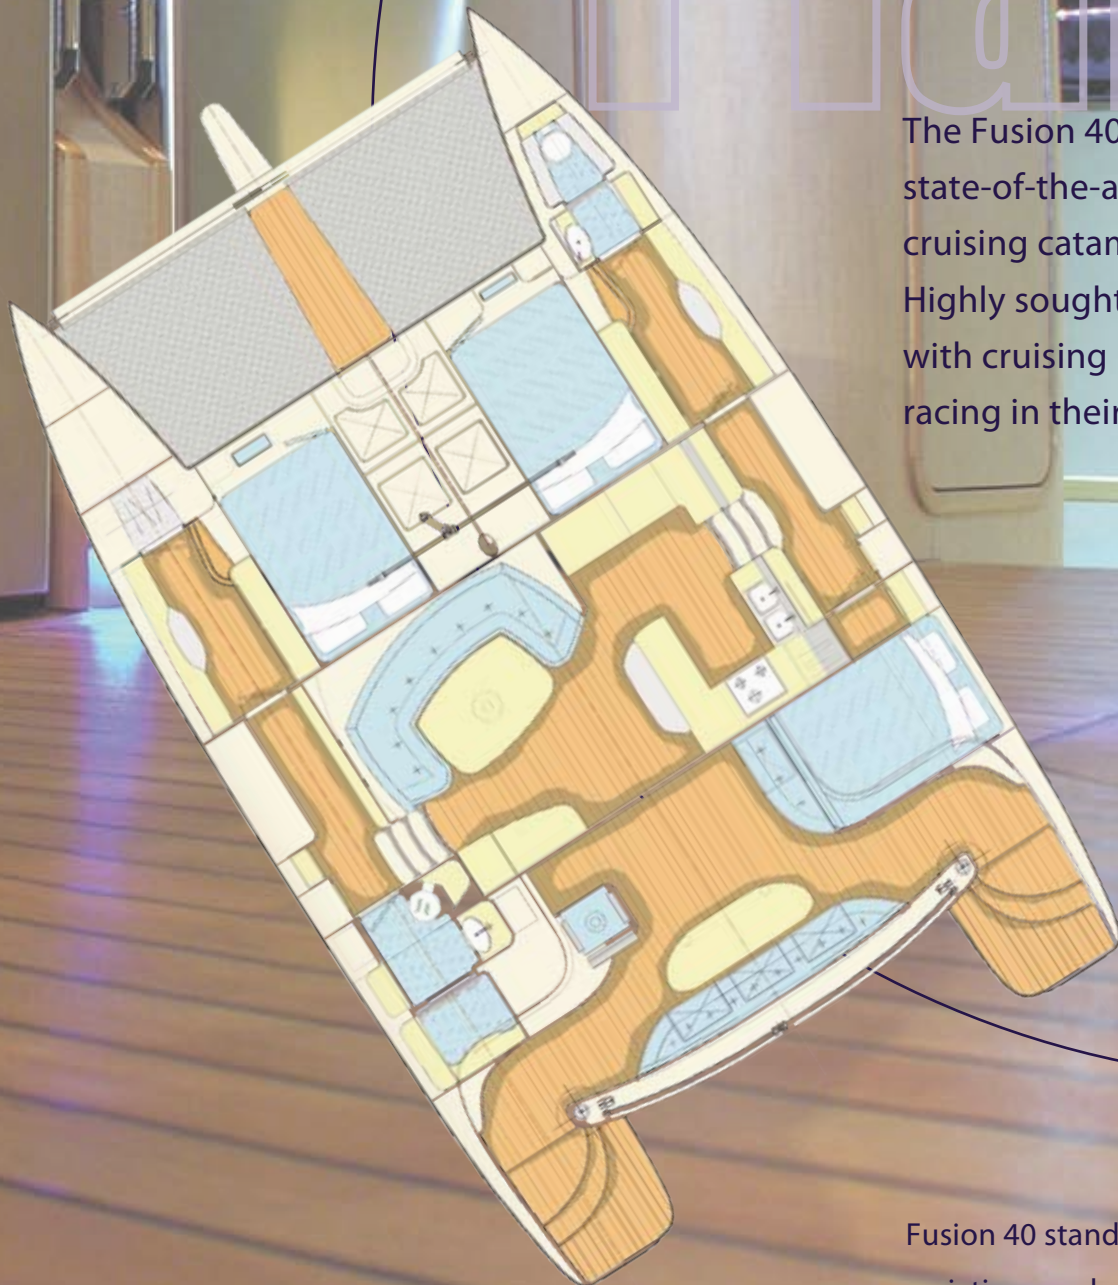

With such great performance, one might be surprised at the Fusion 40's luxurious interior. Designed by Carr Design, the galley-up, three stateroom layout, is roomy and well appointed with all the latest amenities. Fusion's use of fine hardwood veneers, hardwood flooring, laser cut granite counter tops, and ultra light weight, ultra strong materials, might only be expected in much larger yachts.

FLOOR PLAN

Floor Plan

The Fusion 40 is an affordable state-of-the-art, high performance cruising catamaran like no other. Highly sought after by the sailor with cruising in their heart and racing in their soul.
